Foreword

Due to the presence of the Multiverse plugin, the server contains several worlds in parallel. Most of these worlds can be visisted by members. Each chapter in this book corresponds to one world, covering all significant landmarks. For the sake of simplicity, this does not include the world's alternative dimensions (such as, the nether and the end).

An automatically updated map of the server's many worlds can be found on the DynMap.

Claiming & Discovery

If you are to discover a world or landmark is missing, or you are the uncredited owner of a page, please contact Cryotheum#4096 on discord. The same goes for buildings that have temporary names, which are written in *italics* and link to this page.
